

## SELF-PORTRAIT COLLAGE LINKS

The following images are not digital images but actual collages made primarily with paper materials in the traditional collage mode. Nevertheless, their style and structure may inspire you to consider the approach you may want to take with your own design.

*(Please note that due to the rapid rate of change in website content it is possible that some of the material listed here is no longer available online – if you encounter any unavailable content at any of these links please let me know.)*

Here is a link to a short video on the history of self-portraits. It includes a couple of the popular hits we discussed in class but adds a couple of new wrinkles.
